

Bermuda Recycling Volumes

During 2011/12, Waste Management dealt with 134 shipping containers of recycling — 50 of which supplied local construction with crushed glass, with 84 going to the US recycling market.

Overseas went 18 containers of air conditioners; 26 containers of vehicle batteries and 11 of motor oil; four containers of transformers; four containers of tin, and two of aluminium.

Household batteries and fluorescent tubes filled one container each. E-waste accounted for 17 containers.

50 Crushed glass

18 AC units

26 vehicle batteries

11 motor oil

17 Ewaste

4 transformers

4 baled Tin (steel cans)

2 baled aluminium cans

1 Household batteries

1` Fluorescent tubes and bulbs (chipped in 50 gal drums)
